# UNIVERSITY TRADING TOURNAMENT

# 2026

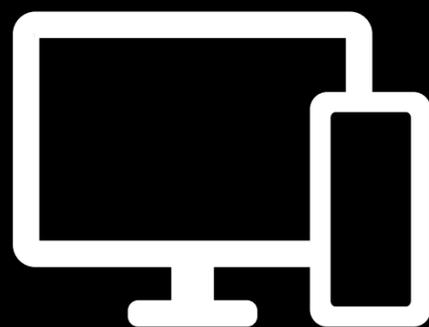

1000+ Participants

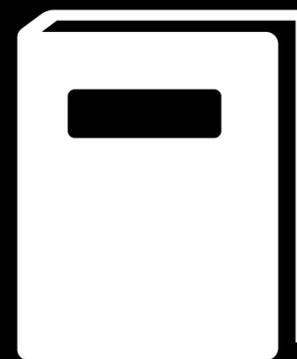

Full month of trading

Final conference and  
award ceremony

Our own virtual platform

Educational content

# NEW VISUAL IDENTITY

The University Trading Tournament logo represents knowledge, analysis, and growth. Its circular form symbolizes market continuity, while the yellow arrow highlights an upward trend and long-term expansion. The minimalist "UTT" typography features a discreetly integrated candlestick between the two T's, bridging academic learning with real-world market dynamics.

**University Trading Tournament** is an interdisciplinary student competition in virtual securities trading. The first edition of the competition was launched in 2015 by the Finance Club of the Faculty of Economics, University of Zagreb. It offers students passionate about finance a unique opportunity to deepen their understanding of financial markets and apply their knowledge in a real-world environment.

This year's project, while maintaining the successful elements of previous editions, places special emphasis on a new digital platform developed through interdisciplinary cooperation by FER and EFZG students, which represents the key innovation of the project. The platform enables a simpler and more structured access to the markets, with an intuitive trading concept that provides participants with a realistic and educational insight into the functioning of financial markets, which further strengthens the educational value and long-term sustainability of the project.
